

Task Session (1)

Tic Tac Toe - Background Change & Restart Button

Objective: Enhance the Tic Tac Toe game by customizing the visuals and adding a game restart feature.

Instructions:

1. Change the Background:

- Go to the Designer section and choose a new background color or upload an image to use as the game board's background.
- Ensure the background image or color doesn't obstruct the game board's visibility.

2. Adding a Restart Button:

- Add a Button labeled "Restart" below the game grid.
- In the Blocks Editor, program the Restart button to reset all variables (game board, current player, etc.).
- Make sure pressing the Restart button clears the game board and sets everything to its initial state, allowing a new game to start seamlessly.

3. Testing:

- Test the background for clarity and aesthetics.
- Verify that the Restart button resets the game properly without errors.
