Task Session (1)

Objective: Create a simple HTML page and use an image as a link.

Instructions:

1. HTML Structure:

- Create a basic HTML page structure.

- Include the necessary DOCTYPE declaration, `<html>`, `<head>`, and `<body>` tags.

- Add a title for your page inside the `<head>` section.

2. Content:

- Within the `<body>`, add a heading that serves as the title of your page.

- Add a paragraph to describe the content or purpose of your page.

3. Image as a Link:

- Insert an image into your HTML page using the `<img>` tag and make the image a clickable link.

4. Attributes:

- Ensure the image has appropriate `src` and `alt` attributes.

- Use the `target="_blank"` attribute within the `<a>` tag to open the link in a new tab.

What is HTML?

HTML HTML stands for Hyper Text Markup Language

HTML is the standard markup language for creating Web pages

HTML describes the structure of a Web page
