Task Session (3)

Session 3: Advanced DOM Manipulation

Objective:

1. Use JavaScript to create a new `<p>` (paragraph) element.

2. Set its inner text to "This is a dynamically created paragraph."

3. Append the paragraph element to the body of the HTML page.

4. Add an `onClick` event to the paragraph that displays an alert with a custom message.

5. Add an `onMouseOver` event that changes the text to uppercase.
