Task Session (5)

Objective: Create a login form using inline styles to replicate the provided design.

Instructions:

1. HTML Structure:

- Create an HTML document with a basic structure, including `<head>` and `<body>`.
- Set the document's title in the `<head>` section.

2. Form Design:

- **Container:** Create a container `<div>` to hold the form elements. Use inline styles to set the background color to black.

- **Heading:** Add a heading with the text "Login Form." Apply inline styles to set the font size, color, and alignment.

- **Labels and Inputs:**

    - Add labels and input fields for "user name," "password," and "age." Use inline styles to set the font color to red and adjust the font size.

    - Style the input fields with a white background and a border using inline styles.

- **Button:** Add a "Sign Up" button and style it with a brown background, white text, and appropriate padding using inline styles.
